SWEN303 ASSIGNMENT 3 INTERVIEW Q&A

Q: Tell me about a group project you worked on previously (or this one), what was it for, and how big was the group?
A:

Q: Walk me through how your group first got organised, what tools did your group decide to use, who decided what gets used, and why did you choose them?
A:

Q: How much of the tools you use are provided by uni (GitLab, Canvas) versus externally (Discord, Google Docs, GitHub etc)?
A:

Q: Tell me about the last time your group needed to share or edit a document together. What did you actually use, and how did that go? Was it convenient?
A:

Q: How did you group manage to keep track of who was doing what?
A:

Q: Tell me about a time group coordination went badly. What happened, and how did it make you feel?
A:

Q: Has there been a time a tool(s) you were using (Git, Docs, Discord, whatever) got in the way rather than helped. What happened?
A:

Q: Has the **amount** of external tools required for a project ever felt inconvenient or overwhelming? How so, and what did you do to manage?
A:

Q: Would you prefer if there were less degrees of separation between the platforms? / Which tools or tool features from past projects do you wish would have been integrated, and more accessible?
A:

Q: Was there a moment you felt out of the loop on what your group had done? Tell me about it.
A:

Q: Is there a habit your group settled into for staying coordinated (e.g. weekly in person meeting, Discord server)? How did that start and did you have to rely on tools outside of uni?
A:

Q: Tell me about the last time your group submitted a project. Walk me through that process, step by step. Was it as convenient as a one-button submission or did you have to round up files from different external sources (Google Docs, GitHub, IntelliJ)?
A:

Q: Did your group ever get stuck and need help (i.e from a tutor or lecturer)? What did you do?
A:

Q: How did that compare to how you'd ask for help on solo work?
A:

Q: As a whole, would you say you’re satisfied with the way group projects are ran through university?
A:

Q: Is there anything about working in groups at uni that's been a problem that I haven't asked about?
A:
